

ELATA[®]

Hybrid System

ELATA®

Zero preventable pressure injuries. That's the goal.

Prevention starts early. Comfort should be effortless.
Confidence should feel like peace of mind.

Elata®, derived from the Latin word "elatus", meaning elevated, reflects our purpose, which is to deliver personalised, intuitive pressure care that protects life with dignity, comfort, and trust.

We believe true care means more than prevention. It means imagining a future where patients feel weightless and supported in such a way as if no mattress exists at all. Not just reducing pressure, but elevating the body beyond it, removing the risk entirely.

Every Elata® innovation moves us closer to that vision. From pumps that adapt in real time, to hybrid systems that evolve with each client, we are building today for tomorrow's breakthroughs.

Not just supporting patients where they are but uplifting them toward what's possible.

Behind it all is advanced Elata® technology that quietly senses, adapts, and streamlines setup, so clinicians can focus on care, not settings.

WHY WE EXIST

We believe in Zero preventable pressure injuries. It's ambitious but it's necessary. Pressure injuries cause complications. They also add workload and cost. We act before that pain starts.

WHAT THIS MEANS

- **Care** that preserves dignity.
- **Compassion** that simplifies decisions.
- **Commitment** to better outcomes, every day.

HOW WE DELIVER

Advanced systems that adapt to every patient and pathway. Designed to simplify prescription, enhance comfort, and reduce clinical risk.

We deliver personalised, intuitive pressure care, protecting life with dignity, comfort, and trust.

Battery Backup with **Elata PowerGuard™** for up to 12 hours*

Lock/Unlock user Interface

Alarm Silence button

Elata AdaptiveMode™ for personalised responsive therapy

Constant Low Pressure (CLP) Mode*

Max Inflation Mode

Pressure Comfort Setting*

Service Required Alarm and Diagnostics

Pump/Mattress Disconnection Alarm

Low Pressure Alarm

Backrest Tilt Sensor auto support with **Elata TiltSense™***

**Available on EP20AU model only. Features vary by model. See IFU for details*

MEET ELATA® TECHNOLOGY

THE PUMP THAT KNOWS YOUR MATTRESS AND WHAT TO DO NEXT.

Elata ID™ pairs the pump and mattress automatically, then sets the right mode. It's true **plug and go. No menus. No guesswork. Just care.**

Why it matters

- Right mode, first time.
- Safer defaults.
- Faster handover.
- Less training.

Quiet by design

Premium compressor, intelligent air pressure management and anti-vibration control deliver smooth inflation and ultra-quiet operation, for calmer spaces and better rest.

Modes made simple

Control is simple, intuitive, and one-touch, with breakthrough features like **Elata AdaptiveMode™**, Constant Low Pressure (CLP) and Max Inflation.

Safety, always on

Elata PowerGuard™ battery backup (EP20AU only) keeps therapy running during power loss. **Elata SafeHold™** safely powers down to hold stable pressure until mains power returns. Backrest tilt sensing with **Elata TiltSense™** adds support when the backrest is raised. Clear, guided alerts keep clients safe.

Built for today and tomorrow

Serviceable design, USB-C service access, diagnostics, and firmware-ready architecture will extend value across your fleet.

Built for teams

Easy to clean silicone touchpad and cable management keep things tidy and simple in busy care environments.

ELATA® TECHNOLOGY

Elata AdaptiveMode™

AdaptiveMode™ takes alternating therapy further. It automatically senses client movement and fine tunes pressure across the cycle. Clinician Login lets you override the default alternating mode, adding flexibility when needed. The result is personalised, real-time protection that reduces disturbance. Dynamic therapy made simple, providing consistent comfort and effortless care.

Elata TiltSense™

Angle aware support with no guesswork. **TiltSense™** uses an internal sensor to detect incremental changes in the backrest angle ($\approx 10-30^\circ$). As the angle rises, the pump automatically increases pressure. When the backrest lowers, pressure returns to the prior setting. No manual input is required, which helps prevent “bottoming out” and protects comfort when clients are inclined.

Elata SafeHold™

Peace of mind during a power outage. **SafeHold™** stabilises mattress cell pressures, safely powers down, and protects clients without carer intervention.

Elata PowerGuard™

Uninterrupted care, even in a blackout. **PowerGuard™** keeps the EP20AU pump running for up to twelve hours, delivering full therapy and then transitioning to safe low power mode until it reverts to **SafeHold™**.

ELATA®

ENGINEERED. TESTED. TRUSTED.

WHERE OTHERS SEE ONE FRAME, WE SEE THE WHOLE PICTURE.

We partnered with **Flinders University** to build a **next generation test system**. Traditional mapping captures one static snapshot every 30 minutes. Our system records **thousands of pressure points** every second. This delivers a **true picture** of how weight shifts and movement affects support.

That depth of data underpins Elata's range of mattress models; E300, E400, E500, E600, and E700. So you can trust the results.

AUSTRALIAN DESIGNED & ASSEMBLED. LOCALLY TESTED.

Elata® pumps are assembled and rigorously tested here in Australia. That local focus keeps us agile. We listen, adjust, and roll out updates quickly, strengthening performance and delivering the fast, intelligent care clinicians expect.

EVERY PRESSURE INJURY RISK LEVEL. ONE MATCHING SOLUTION.

SIMPLE CHOICES. CLEAR PATHWAYS.

Elata® Range. Quick Category Guide

CATEGORY	MODEL	PURPOSE	PUMP
Homecare	E100, E200	Simple prevention for home and aged care. Default choice in home care pathways.	N/A
Clinical Foam	E300	Non-powered. Prevents and treats Stage 1–2 pressure injuries. 9-zone foam with side wall support and heel offloading. Low maintenance.	
Clinical Hybrid	E400	Use alone for Stage 2 pressure injuries, or step up with a pump to support treatment up to Stage 4. Ideal for home and palliative care. Converts as needs change.	EP10AU
Clinical Alternating Hybrid	E500	Alternating air/foam system. Combines comfort with therapy. Treats up to Stage 4 pressure injuries.	EP20AU
Clinical Alternating Air	E600	Full alternating air (1-in-2 configuration). Treats up to Stage 4 pressure injuries. Ideal for surgical wards, acute wards, or clients with frailty/reduced mobility.	EP10AU
	E700	Advanced alternating (configurable 1-in-4). Auto-setup. Treats up to Stage 4 pressure injuries. For ICU, spinal, complex rehab, immobile clients.	EP20AU

The EP20AU Pump is fully backwards compatible. It can be used with all Elata pump-ready mattresses (E400 to E700)

Use the Mattress Selector Tool

ELATA[®]

E400

STEP UP. STEP DOWN. STAY IN CONTROL. ONE MATTRESS FOR CHANGING NEEDS.

A hybrid system with paired air cells and foam inserts. Use without a pump for lower-risk clients. Add a pump for dynamic therapy. Supports Stage 2 pressure injury management without the pump, and up to Stage 4 with the pump.

Core Foam

Five pairs of transverse air cells with a profiled foam insert, encased in a waterproof TPU cover which reduce noise and block fluid ingress.

Side Wall Support

Adds stability and edge awareness for safer transfers enhancing comfort, balance and confidence.

Stability Core Layer

Supportive base layer enhancing stability, comfort, and pressure redistribution.

Cable Tidy

To prevent damage to wires.

Can be used with or without the pump
230kg SWL

Pure Guard Cover

Easy to clean, with a 4-way stretch, vapour-permeable surface that moves with the user to reduce friction and support immersion and envelopment. It allows moisture to escape while blocking fluids, viruses, and bacteria for safer care.

Hydro Lock Barrier

A welded seam and liquid resistant zip flap prevent fluid penetration, protecting mattress integrity.

Rebound Core Foam

High rebound density and microclimate control. It promotes airflow and delivers lasting pressure redistribution. Maintains skin integrity. Increases ease of mobility.

Anti Shear

The top layer moves with the client to protect skin and underlying tissues, reducing both visible and hidden shear damage.

Heel Offloading

Foldable foam suspends the heels to relieve 100% of pressure and prevent injuries.

Heel Slope

Gentle decline at the foot end reduces heel pressure and helps prevent injuries.

Accessible Handles

To ensure easy control / transport.

HYBRID MATTRESS E400

Model E400S	Size: 88cm*200cm*19.5cm SWL: 230Kg
Model E400KS	Size: 107cm*200cm*19.5cm SWL: 230Kg
Mattress Warranty	5 years*
Pump Warranty	10 years conditional*
Compliance	ARTG: 520915 ISO: 14971, 10993

*Refer to Instructions For Use (IFU)

Why clinicians choose it:

- Paired air cells **respond to movement** and rebalance pressure.
- **Heel Slope + Side Wall Support** improve comfort and safety.
- **Rebound Core Foam, Anti Shear, and Heel Offloading** features protect skin.
- **Add a pump to step up to dynamic therapy** supporting treatment up to Stage 4 pressure injuries.* Similarly, the mattress's function can be simplified as the patient's condition improves.
- Perfect for remote clients, the E400 **works with or without a pump** delivering reliable care even when no power supply is available.
- **+EP10AU pump:** Plug in and go. The pump recognises the E400 with Elata ID™ and sets the mode for you, adjusting automatically for weight and body position.

Why it matters:

- **Comfort & Pain Relief:** Smooth static comfort, dynamic relief when paired with pump.
- **Workflow & Hygiene:** Interchangeable parts; reduces logistics and cleaning costs.
- **Powered by ElataID™** Autodetects the mattress, matches the optimal mode, and adapts as conditions change.
- **Elata AdaptiveMode™** Senses movement, adjusts pressure and cycles for personalised, responsive therapy.

***Upgrade to dynamic therapy with the EP10AU pump.**

ELATA[®]

Temperature: 22°C - 71.6°F

ELATA EP10AU

NON-POWERED

- Date: 2025 / 07 / 15
- MAX: 30.93 mmHg
- Average: 3.18 mmHg
- Frame: 600 / 3600

POWERED: AUTO SETTING

- Date: 2025 / 09 / 12
- MAX: 29.34 mmHg
- Average: 3.36 mmHg
- Frame Cycle A: 208 / 3600
- Frame Cycle B: 611 / 3600

ELATA[®]

E500

HYBRID THERAPY, COMFORT FOCUSED FOR PAIN RELIEF

FOAM FEEL. AIR PERFORMANCE.

A foam+air hybrid with alternating therapy. Prevents and treats pressure injuries up to Stage 4. Designed as a pain relief mattress for sensitive clients.

Core Foam

Three sections of transverse air cells with a profiled foam insert, encased in a waterproof TPU cover, reduce noise, block fluid ingress.

Backrest Tilt Sensor

Auto support with ElataTiltSense™

Side Wall Support

Adds stability and edge awareness for safer transfers enhancing comfort, balance and confidence.

Stability Core Layer

Supportive base layer enhancing stability, comfort, and pressure redistribution.

Cable Tidy

To prevent damage to wires.

230kg SWL

Pure Guard Cover

Easy to clean, with a 4-way stretch, vapour-permeable surface that moves with the user to reduce friction and support immersion and envelopment. It allows moisture to escape while blocking fluids, viruses, and bacteria for safer care.

Hydro Lock Barrier

A welded seam and liquid resistant zip flap prevent fluid penetration, protecting mattress integrity.

Rebound Core Foam

High rebound density and microclimate control. It promotes airflow and delivers lasting pressure redistribution. Maintains skin integrity. Increases ease of mobility.

Anti Shear

The top layer moves with the client to protect skin and underlying tissues, reducing both visible and hidden shear damage.

Heel Offloading

Foldable foam suspends the heels to relieve 100% of pressure and prevent injuries.

Heel Slope

Gentle decline at the foot end reduces heel pressure and helps prevent injuries.

Accessible Handles

HYBRID MATTRESS E500

Model E500S	Size: 88cm*200cm*19.5cm SWL: 230Kg
Model E500KS	Size: 107cm*200cm*19.5cm SWL: 230Kg
Mattress Warranty	5 years*
Pump Warranty	10 years conditional*
Compliance	ARTG: 520915 ISO: 14971, 10993

*Refer to Instructions For Use (IFU)

Why clinicians choose it:

- **Battery Back Up** with Elata PowerGuard™ for continuous care.
- Air cells under a soft foam surface **redistribute pressure** effectively.
- **Rebound Core Foam, Anti Shear, and Heel Offloading** protect vulnerable areas.
- Low maintenance. Interchangeable parts. Always ready to care.
- **Backrest Tilt Sensor** auto support with ElataTiltSense™

Why it matters:

- **Comfort & Pain Relief:** Smooth static support with dynamic pressure redistribution from the integrated pump.
- **Workflow & Hygiene:** Interchangeable parts; reduces logistics and cleaning costs.
- **Powered by Elata ID™** The pump auto-detects the mattress, selects the optimal mode, and adapts as conditions change.
- Includes Elata **PowerGuard™** battery backup and **TiltSense™** auto adjust support preventing bottoming out and protecting comfort.
- **Elata AdaptiveMode™** Senses movement, adjusts pressure and cycles for personalised, responsive therapy.

TRUSTED PERFORMANCE

Innovation that feels simple. Support that feels human.

Elata® brings smart, intuitive systems that adapt to every need backed by expert support and built to evolve. We keep complexity out of your day, and precision at the bedside.

Pure Guard Cover

Easy to clean, with a 4-way stretch, vapour-permeable surface that moves with the user to reduce friction and support immersion and envelopment. It allows moisture to escape while blocking fluids, viruses, and bacteria for safer care.

Hydro Lock Barrier

A welded seam and liquid resistant zip flap prevents fluid penetration, protecting mattress integrity.

Rebound Core Foam:

High rebound density and microclimate control. It promotes airflow and delivers lasting pressure redistribution. Maintains skin integrity. Increases ease of mobility.

Anti Shear:

Top foam layer moves with the client when the client is repositioned, helping protect the skin by preventing shear and friction.

Heel Offloading:

Configured to suspend and reduce pressure on the heels, ideal for preventing and treating pressure injuries, including Stage 4.

PRESSURE INJURY STAGING (NPIAP/EPUAP/PPPIA)

STAGE 1	STAGE 2	STAGE 3	STAGE 4	UNSTAGEABLE
				
Intact skin. Nonblanchable redness over a bony area.	Partialthickness skin loss. Open or blistered wound. No slough.	Fullthickness skin loss. Fat may be visible. No exposed bone.	Fullthickness tissue loss with exposed or palpable bone, tendon, or muscle.	Fullthickness tissue loss, but depth is hidden by slough/eschar.

MATTRESS SELECTOR TOOL

THE RIGHT SYSTEM. FIRST TIME.

Scan to get a guided match based on risk, setting, and clinical goals. It's fast and repeatable.

Not sure which system to choose? Our assessment tools help you find the best mattress and pump combination for your clients.

STANDARD IS JUST THE BEGINNING

// We are passionate about improving pressure care solutions, delivering advanced foam, hybrid, and alternating air mattresses, along with efficient pumps that set new standards in prevention. Through rigorous research and testing, we aim to exceed industry standards. //
We question every detail and ensure each feature serves a purpose.
